

# The Desert of Discipline

## Beginning October 8

Join us for the most unusual series Pastor Ed has ever preached. We will skim the surface of Egyptology and engage in a few speculations, carefully distinguishing between the *dependable* truth of God's Word and *possible* harmonization with Egyptian history.

We will begin our journey with Joseph. Are memories of Joseph to be found in the Egyptian *Imhotep* legend? Did Egypt become a much greater power because of Joseph?

Is it possible that the 18-year-old mummy of **King Tut** (*Tutankhamen*) is really Pharaoh's son who was killed during the plague of the firstborn?

We will briefly look at evidence that the economy and political life of Egypt was devastated (and chaotic) after two million slaves took the wealth of the people with them under the leadership of Moses. But we will stay near the surface, and the information will not be intimidating.

With the help of clips from relevant DVDs, we'll show you footage about the route of the Exodus, **the underwater bridge** that the Israelites used to cross the Red Sea (and **Pharaoh's chariots which have calcified** at the bottom of the sea), and the discovery of **the real Mt. Sinai** in Saudi Arabia. We'll view **the rock that poured forth water**, the remnants of **Aaron's calf altar**, and the markers Moses had set around the mountain.
